

**Hold our elected officials accountable to make  
Down syndrome research funding a priority**

Join Down syndrome advocates worldwide and sign Global's Petition of Support! Now more than ever it's important to show lawmakers their communities support Down syndrome research. Help us reach our goal of 5,000 signatures so we can present a compelling petition in D.C. later this year!

**Cnic scientists publish groundbreaking  
leukemia research in *The Journal Cell***

Research by Cnic Institute scientists Dr. Espinosa and Dr. Sullivan, and distinguished Northwestern University scientists, show how targeting molecular pathways with existing drugs has the potential to halt progression of AML leukemias, especially prevalent in people with Down syndrome.
